Hit and run victim released from Hospital

7 year old Deasha Butts was the victim of a hit and run on Iowa Ave, on Feb. 26, 2016 but after 10 days in Loma Linda Hospital and recuperating in the Totally Kids Rehabilitation Hospital in San Bernardino, she was released to go home on March 18, 2016.

Deasha is a student at the Highgrove Elementary School and as the photo above shows, she has a great attitude that she is expressing by her 2 thumbs up!

Just 4 days after the accident, we visited her in the Hospital on March 1, 2016 which was on her birthday.

The day after her birthday on March 2, 2016, Brendan Garth Vinsen, 48 was arrested in Jurupa Valley on suspicion of felony hit-and-run and is scheduled to go to court on April 15, 2016 according to the CHP.

We contacted Cal Skate in Grand Terrace an organized a fund raiser to help pay medical bills. 100% of the fees collected on Sunday March 6th, when accompanies by a coupon from the Highgrove Happenings, were given to her mother Bobbie Butts. We also gave your donation-checks made out to Bobbie Butts and thank those who helped them.

Additional photo on P. 7

Abandoned Railroad track needed for "Rails to Trails"

This is a view of the abandoned railroad right of way that was previously owned by the Pacific Electric, Southern Pacific, and most recently Union Pacific Railroad. The single track used to run from the Colton Union Pacific Yard through Grand Terrace and Highgrove and dead ended near 3rd St.in Riverside. This track was abandoned because the UP railroad did not want to build a wider bridge when the I-215 freeway was widened. Wouldn't this

be an ideal place for a trail between the freeway in Grand Terrace and Highgrove?

There is a program available called "Rails to Trails" and the Highgrove Happenings is currently asking for your help in finding out what has to be done to convert this abandoned railroad right-of-way into a trail from the I-215 freeway, through Highgrove to Marlborough Ave. in Riverside. If you can help please call (951) 683 4994.

Two Mail boxes broken into, one on Chickadee Circle and one on Mandarin Way!

This photo was taken on March 18, 2016 on Chickadee Circle in Highgrove. Another mailbox was broken into on the same day possibly between 9:00 am on March 17th and 7:30 am on March 18, 2016. See P. 3

HIGHGROVE SHERIFF REPORT

During this rating period March 8 to 21, the community of Highgrove had five part one crimes in 2 weeks, 1 robbery, 1 assault (domestic violence) 1 auto theft and 2 petty thefts. There were no rapes, arsons or homicides. Lieutenant Dave Kondrit (951) 955 2632

Sheriff Dept.: (951) 776-1099 X 5 (Non emergency)

Capt. Jason B. Horton (951) 955 2600

Lieutenant Dave Kondrit (951) 955 2632

Hot line tips for Highgrove area: (951) 955-2600

Tips on how to protect your mail

Comments from Lieutenant Kondrit about mailbox theft:

“Unfortunately this is more common than ever. Eastvale had 55 separate incidents. When we caught our suspect they still had an entire mailbox in their apartment. That suspect admitted to making a living stealing mail. Here are some recommendations to prevent and minimize the impact of mail theft.”

- Use the letter slots inside your Post Office for your mail, or hand it to a letter carrier.
- Pick up your mail promptly after delivery. Don't leave it in your mailbox overnight. If you're expecting checks, credit cards, or other negotiable items, ask a trusted friend or neighbor to pick up your mail.
- If you don't receive a check or other valuable mail you're expecting, contact the issuing agency immediately.
- If you change your address, immediately notify your Post Office and anyone with whom you do business via the mail.
- Don't send cash in the mail.
- Tell your Post Office when you'll be out of town, so they can hold your mail until you return.
- Report all suspected mail theft to a Postal Inspector.
- Consider starting a neighborhood watch program. By exchanging work and vacation schedules with trusted friends and neighbors, you can watch each other's mailboxes (as well as homes).
- Consult with your local Postmaster for the most up-to-date regulations on mailboxes, including the availability of locked centralized or curbside mailboxes.
- If you see a mail thief at work, call 911. Or if you believe your mail was stolen, call the (Non-Emergency) number (951) 776 1099 immediately, then call Postal Inspectors at 877-876-2455 and press 3.

New Colors of Highgrove T-Shirts available!

If you live in Highgrove you need a T-Shirt that has our Highgrove logo on the front and a 1916 Highgrove citrus label on the back. Some say: “Where Center St. is the main street and Main St. is at the edge of town” Others say: Where half of our main street is in the next county”.

HIGHGROVE HAPPENINGS

Geological Rambles and Rumbles

By Robert Fakundiny

State Geologist Emeritus, New York

Gemstones of the Southern California Batholith: Tourmaline

Previous articles have discussed the geologic setting of the rocks around Highgrove and in the Southern California Batholith (SCB) (fig. 1); these articles also have described some of the gems and minerals that can be found within the SCB pegmatites (granitic veins that generally consist of quartz, feldspar, and mica). Maps delineating pegmatite districts and mine locations and listing some of the gems and minerals that occur within the pegmatites are available at many websites. Although most commercial mining of gems and rare minerals has ceased, the Pala District (fig. 1) still yields lepidolite (a lithium mica), spodumene with gem-quality crystals of kunzite, beryl, feldspar, and quartz to collectors. Other pegmatite districts in the SCB have yielded gem-quality beryl in pink (morganite), green (emerald), and bluish green (aquamarine); amblygonite (a fluorophosphate mineral that is a source of lithium but not favored as a gem because it is susceptible to breakage and general wear); essonite (a garnet); apatite (a phosphorus- and fluorine-bearing soft mineral that is a major source of fluoride for toothpaste); smoky quartz; and feldspars such as moonstone, orthoclase, and amazonite. One of the most beautiful and unusual gems from the SCB, in my opinion, is tourmaline, which along with opal is the birthstone of October.

Tourmaline was first discovered as a green crystal in Brazil in the 1500s but was mistaken at that time for em-

erald. It was finally recognized as a separate mineral in the 1800s. The name comes from the word "taramalli" in a language in Sri Lanka meaning "mixed gems" or "mixed colors." Tourmaline has been used as a gem for centuries, but was mistaken for ruby, sapphire, emeralds, and others. Tourmaline was reported from California as early as 1892 and was praised by Tiffany gemologist George F. Kuntz, for which the gem kunzite was named. Tourmaline's popularity at that time was greatest in China, and most of the production from San Diego County was shipped there, but production dropped off precipitously when the Chinese economy collapsed in 1912. (Adapted from Tourmaline History and Lore (<http://www.gia.edu/tourmaline-history-lore>)).

Tourmaline is generally described as an aluminum boron silicate; the boron in its chemical structure is typical of many other gems and minerals in the SCB pegmatites. It is relatively hard (7.0 to 7.5 on the Mohs hardness scale, described in a previous article). Its colors are derived from constituents such as iron and possibly titanium (green and blue) and manganese (reds, pinks, and possibly yellow). Irradiation of tourmalines by natural processes or in the laboratory enhances the pink and yellow hues. The most common form of tourmaline is schorl, which is black, but tourmaline colors span the spectrum in mostly pastel hues. Several of the colored varieties are called elbaite, which is commonly green or red.

Tourmaline crystals also have unusual physical and electrical properties. The crystalline structure is trigonal (as in trigonometry), which means that the crystals are triangular and long, with terminal facets

that come together as a point (figs. 2A, 2B); they also have rounded sides that are distinguished by striations (grooves) parallel to the long axis (fig. 2C). Tourmaline colors and hues can vary within a single crystal, especially in the varieties called watermelon and liddicoatite, in which red, white, and green occur in patterns that recall sliced watermelons, with green on the outside, red in the middle, and white between (fig. 2D).

Tourmaline has a property known as pleochroism, where turning the crystal in a directed light beam causes it to change color. Tourmaline crystals also have a pyroelectric response, where application of heat produces an electric charge such that one end becomes negative while the other becomes positive. The crystals also have piezoelectric properties, where contortion by stress (bending) produces an electrical charge. These electrical properties, which give tourmaline the nickname "electric stone," are being continually studied for possible use in microelectronic units.

Tourmaline varieties are named according to their chemistry and color. Those varieties found in the SCB include achroite (colorless), emeralite (green), indicolite (blue, aquamarine), rubellite (red), watermelon (red, green, and white),

schorl (black), and cat's eye, which resembles a cat's eye with narrow pupils; this is caused by tiny parallel fibers or needle-like inclusions. Cat's eye tourmalines come in a variety of colors, of which green and pink are the most common, but yellow to orange, blue to blue-green, violet to red, brown to black, and multi-colored crystals have been found. Mines in the Pala District (fig. 1) in which tourmalines have been found are listed and located on maps at <http://www.mindat.org/loc-3560.html>.

Tourmaline in its many varieties can form impressive gems. When purchasing a gem-quality tourmaline, look with a microscope or loupe (hand lens) for flaws such as inclusions of other minerals, bubbles of gases, and air holes. These can enhance a gem, such as in the cat-eye effect, or produce off-colors by gas and air bubbles, or they may diminish the specimen's appearance and value.

The pegmatites of the SCB have yielded a bounty of rare minerals and gems that have been mined for commercial use, incorporated into mineral collections, and cut into beautiful gems. Further scouring may produce many more. A future article will discuss the gems of the San Jacinto Mountains.

(Color samples shown on P. 7)

HIGHGROVE HAPPENINGS

Phil's Philosophy

By Phil Turner
Unions and The Democrat Party

I don't know the origin of the marriage between labor unions and the Democrat party. At this point, it is enough to say it has been thus for decades. Unions now, are very much, an organizing branch of the Democrat party.

Union retirement/pension funds are invested in giant blocks of stock and shares in American business. It makes sense that unions would support legislation friendly to business.

But the Democrat party has pushed for regulating and taxing business to the point that many corporations leave their overseas profits in overseas banks. The tax burden makes it prohibitive for them to bring that money home and reinvest here in the U.S.

The Democrat party has legislated the most stringent regulations and highest corporate taxes in the world, resulting in corporations locating many of their manufacturing facilities overseas, taking advantage of lower taxes, fewer regulations, and a very willing workforce. All those facilities, and jobs, are lost to our own workforce. Unions have seen their numbers dwindle. Why, because porous borders have produced millions of illegal aliens willing to work for much less than union wages, with no benefits.

So the question is...why do union members vote Democratic every election cycle? What is the Democrat Party doing for you? Or, more precisely, what are they doing TO you?

I just retired as a vice-president of a local teachers association. Every election cycle they would send me voting pamphlets on who to vote for, and which propositions to support. They would list the Democrat candidates, with a big check mark beside their names. There was never any verbiage about their qualifications, voting record, or their political stance on any issue. We were just told to vote for the Democrat. Similarly, just a check mark to indicate which propositions to support.

I guess they felt that actually reasoning with us to vote their way would confuse we poor, feeble minded, union voters.

There is a solution...if you are a member of a union/association, run for a leadership position. If your children, or grandchildren are, encourage them to run for office within the union/association.

I often found myself to be the only Republican in the room when the association met. If we are to affect change, we, our children, and our grandchildren, need to participate in leadership positions.

Editor's note: The opinions expressed in this article are the viewpoints of its author and do not necessarily reflect the viewpoints of the Highgrove Happenings.

Advertising rates

The "Highgrove Happenings" advertising rates are the lowest rates in town. If you have already trained your dog to bring in the paper (like the one on the right) you can be assured that he won't be lifting anything too heavy by bringing in our little newspaper. Some of the other larger newspapers are wasting just too many trees, especially in their Sunday edition. No one should ever ask their dog to lift something that heavy! Our little paper has lots of local news and we take pride in providing you with something free of charge that will fit in the bottom of your birdcage! Give us a call (951) 683 4994 or check out our web site for pricing and sizes of our ads. Go to www.highgrovehappenings.net and click on the contact us page.

Call us !

We have no reporters so we are asking for your help. You can be a reporter by just giving us a call or sending us an E-mail or a picture. Small town news is what we are all about and we want to encourage you to participate. We try to print positive things since there is so much bad news on TV and in other newspapers. Send us a story, take a picture or call us about something that is happening in Highgrove. (951) 683 4994

Please visit our Highgrove Happenings website:

www.highgrovehappenings.net

Keep in touch: Send us your e-mail addresses to help us keep you informed of activities and projects that effect our community. Send your address to:

HIGHGROVE HAPPENINGS

California Dreaming

by Dr. Cynthia Williams.

We the People of the United States, in Order to form a more perfect Union, establish Justice, insure domestic Tranquility, provide for the common defense, promote the general Welfare, and secure the Blessings of Liberty to ourselves and our Posterity, do ordain and establish this Constitution for the United States of America. (Preamble to the US Constitution)

Our United States Constitution provided a detailed, concise framework for our government to work within. It delineated the three branches of government: The Executive Branch (the President of the United States), the Legislative Branch (the Senate and Congress) and the Judicial Branch (the Supreme Court). *Theoretically* the three branches are created to be separate and not controlled by the other. It all looks good on parchment. The reality is, politicians don't work that way.

The glaring, obvious example of this disfunction is the current situation of the recent vacancy on the Supreme Court. The function of the Supreme Court is to rule whether something is constitutional or unconstitutional—whether or not it is permitted under the Constitution. “On the Supreme Court there are nine judges; the judges are nominated by the President and approved by the Senate. They have no term limits. The Supreme Court is the highest court in the land. Its decisions are final, and no other court can overrule those decisions. Decisions of the Supreme Court set precedents—new ways of interpreting the law.” Lady Justice presides over all the courts of our land. She is usually shown with a level scale and blindfolded- reminding us that justice *should be fair and impartial.* The Supreme Court should be nonpartisan and absolutely neutral. My ongoing concern has been this: when there is an opening on the Supreme Court the Legislative Branch should not be involved until a nominee is presented by the President. “The court today is more polarized along partisan lines than it has ever been... This is no accident, but rather the result of deliberate, careful selection of nominees by both parties... The political parties are focused on the court, and it shows.” The President should nominate a judge whom he feels will be the utmost impartial and who will uphold the intent of the Constitution. The jockeying that occurs to place a politically favorable nominee on the court should offend us all. The fact that a potential judge's future opinions could be predicted and therefore, strategically placed on the court should be of great concern as well. This crossing of political/philosophical lines is, in the long run, unhealthy for our country. We have already seen how the deep partisan divide has virtually frozen the democratic process for the past seven years. We don't need more. This country has issues that need to be addressed.

I expect my President to nominate and then the Senate to confirm a judge who will uphold the United States Constitution as it was intended by our founding state leaders in 1787 when they gathered to write the Constitution to create a set of principles that formed how the new nation would be governed. The leaders of the states wanted a strong and fair national government. But they also wanted to protect individual freedoms and prevent the government from abusing its power.

Two Scouts from Grand Terrace became Eagle Scouts at a ceremony at the GTHS on March 5, 2016. Congratulations to these 2 fine young men!

Obituary

Dr. William Darwin DDS

We lost a dear family member and friend of the community last week. Or. William E. Darwin passed on Saturday afternoon, March 19, after a year-long battle with bile duct cancer. Bill, as most of us knew him, practiced general dentistry as well as specialized procedures in private practice for the past 38 years. He had his office first in Grand Terrace and then for the past two years here in Redlands. He was a graduate of the Loma Linda University School of Dentistry In 1981.

Bill was born In Riverside, California, on November 25, 1952, the elder son of Bonnie and Bill Gene Darwin, both of whom survive him.

As a young man, Bill graduated from Colton High School and Riverside Community College. He played guitar with the band Azurite and played high school football as a defensive lineman. He was a lifelong car racing enthusiast and carried his love of sports into his son Liam's participation in RHS football and baseball, and his daughter Georgie's cheerleading. He and his son Liam were active with the Boy Scouts of America, Troop 44.

Doctor Darwin's community service included memberships in the Lion's Club, Sons of the American Revolution, Grand Terrace Chamber of Commerce and the Tr-County Dental Society. He was also a volunteer at the Redlands Homeless Shelter. From earliest days, it was always his practice to donate his dental skills to those in need, and he often worked in conjunction with Child Health (CHOP) in the Public Health Department. His services also included the Colton Unified School District.

He was a supporter of Grove High School, where his daughter Julian graduated, and volunteered with the Redlands Baseball for Youth (RBY) program, as well as Redlands Festival Ballet Company where his daughter Georgie was a dancer. He was a former member of the Redlands Country Club.

Bill was a devout Christian and member of Pathway Church. He was also a former member of the First Baptist Church, Redlands, and Eden Lutheran Church, Riverside, where his grandfather was a pastor. In addition to his parents, Bill and Bonnie Darwin, the family who loved and will miss Bill include his wife Wendi; his son Eric and wife Nicole of Sausalito; daughters Jillian and Georgie and son Liam of Redlands; sister Stephanie Darwin Lewis and husband Robert of Grand Terrace; brother David of Colton, father-in-law Bill Young and wife Doris of Redlands; sister-in-law Leslie Rude and husband Greg of Redlands; aunts and uncles; cousins; and nieces and nephews. Also, his valued colleague, Elena Palamino, who served as Doctor Darwin's dental assistant for 28 years.

Funeral services will be held on Thursday, March 31st at 2:30 P.M. at Pathway Church, 611 E. Cypress Avenue (at Redlands Blvd.), Redlands, CA. Public graveside service will be the following day, Friday, April 1st at 10 A.M. at Evergreen Cemetery in Riverside.

On a closing note, Bill Darwin loved his dog Kelly. If all dogs go to heaven, Kelly awaited him there.
