lighgrove Community Park Fee being analyzed!

By Cynthia Cruz PONY league Secretary **USE OF THE PARK:**

What a joy to see all of the leagues and groups of people who enjoy our own Highgrove Community Park! Sunday there was a men's soccer league passionately running and kicking the ball around the middle of the park. They had set up goals from the edge of one baseball field to the other. Children were outside of the soccer area playing under their mother's watchful eyes as daddies got their exercise. The day before that, we walked to the park and talked to the young adults playing basketball. And there was a volleyball net set up nearby to provide practice for some girls playing volleyball.

Baseball, tennis, jogging or walkingwhatever the preference, the people of this community appreciate this park and the people who pay taxes help pay for this safe way to keep our children and adults off the streets and out of trouble.

tised our intention, and on December 11, 2008 we held our first Board Meeting and elected officers. By the last week in January the majority of our children were signed up.

We filled out Park Gazebo/Ball Field Reservation Requests every time we had a tournament

OBSTACLES:

About this time we received a call from the County. This time it was to inform us that we would have to pay to use the snack bar. Revenue from the snack bar was going to be our main source of revenue to pay for the umpire fees and equipment that we would need for children's safety during the season. And the very next day Riverside County EDA again explained that we needed to pay for the fields. They said that the Board of Supervisors passed a policy last year that would require paying \$15/ per hour per field ~ even for practices! The \$15/hr assessment would cost Highgrove residents more for one weekend than an outside league would be charged at a city park for one year! The CSA 126's tax assessment of \$120 per parcel per year was added to Highgrove parcels many years ago. What is this additional tax used for? Its purpose is to pay for our Sheriff, Parks and Recreation, and Landscaping. This special assessment is in addition to the property taxes that Highgrove home and land owners already pay. This assess-

ment was added to Highgrove parcels over 13 years ago. Three years later the park was opened on October 16, 1999 and we, as Highgrove residents, have paid for this special tax ever since.

We have contacts with many other baseball leagues in the Southern California area and have not found one that gets charged for their own snack bar, fields or lights ~ and they don't even have the extra assessment like we do in Highgrove!

A friend of ours, a reporter for a major Southern California newspaper, attended a meeting recently on how to keep children out of gangs. A gang specialist from the DA's office had a list of the top ten ways to keep children out of gangs. Leading the list was supervised activities for children such as a baseball league. We are proud of the parents who donate their time to who are trying to make their programs such a worthwhile cause. For many beneficial to our children.

years there has not been PONY league baseball at Highgrove Park and we were excited that it was returning to the community.

In spite of these obstacles we were still inspired to move forward with our vision of bringing better baseball back to Highgrove Park. On Tuesday February 24th we attended a Board of Supervisor's meeting to remind them that the residents of Highgrove already pay an extra assessment for these services.

THE GOOD NEWS!

The Riverside County EDA notified us this morning (Feb. 27, 2009) that Supervisor Ashley is analyzing the park fee situation in Highgrove and hopes to resolve this issue very soon!

We pray that next year will not be a battle for any nonprofit organizations

PONY LEAGUE:

In November, 2008, we started speaking with Riverside County EDA Community Parks and Services Division to get permission to use Highgrove Park's ball fields for our son to play baseball in the spring 2009 season. We began to raise the funds necessary to start a nonprofit PONY (Protect Our Nation's Youth) baseball league for the children of our community. We adver-

National Consumer Protection Week OPEN HOUSE

"Survive Today's Economy: Avoid ID Theft and Fraudulent Schemes" Riverside Main Post Office 4150 Chicago Ave. March 5, 2009 10am - 2pm

During National Consumer Protection Week, an Inspector from the U.S. Postal Inspection Service will be available at your local post office from 10am - 2pm. They will be sharing information regarding identity theft and fraudulent schemes. You will be provided with the tools and information needed to combat these frauds.

The California State Department of Consumer Affairs will be available, at selected post offices, to assist you with any consumer issues or concerns. Educational handouts will be available.

A representative from USPS Consumer Affairs Department will be on hand to address any postal concerns and answer any questions regarding our products and services.

Highgrove United Methodist Church

We are living in very difficult economic times. We hear alarming stories of banks that fail, businesses that close, and people who lose their jobs. It is very distressing to hear of people who lose their homes.

In recent weeks we have even heard of people who have taken their own lives and the lives of their loved ones because they lost all hope.

At Highgrove UMC, hope is at the center of what we believe. We believe in a divine presence with us

even through the hardships of life. We also believe in the One who can turn our disappointments into opportunities. We believe in God who is the Lord and Giver of life. We, therefore, seek to let God be our guide and to show us the way through the darkness, the failures, and the loss.

With this in mind, we are inviting our Highgrove Community to join us in a prayer vigil **every Thursday in the month of March beginning at 6 p.m.** We will light candles and pray outside our church on the corner of Center and Prospect. Our candle lights will shine in the darkness as a symbol of hope. Hope for Highgrove! Hope for the U.S.A! Hope for the world!

Please join us every Thursday this month as we stand together during these very difficult times.

PIGEON PASS ROAD

CORRIDOR PROJECT

see story on right

PIGEON PASS ROAD CORRIDOR STUDY

For a clearer picture of this proposed plan go to: http://www.rctlma.org/trans/Pigeon%20Pass%20Overview.html **OVERVIEW**

The Counties of Riverside and San Bernardino, together with the Cities of Moreno Valley and Grand Terrace, are proposing a project to extend and realign Pigeon Pass Road from Hidden Springs Drive in Moreno Valley to Mount Vernon Avenue in Grand Terrace. The project would be a four lane, divided, limited-access arterial. Approximately 5 miles of improvements are planned. The intent of the Pigeon Pass Road improvement project is to increase safety and improve circulation within the area, as well as reduce traffic congestion on roadways between the counties. The agencies recognize the importance of retaining the rural character of the area (context-sensitive design), while at the same time increasing safety and improving access and circulation.

The project team includes agency representatives from areas surrounding the project including the Counties of Riverside and San Bernardino and the Cities of Colton, Grand Terrace, Loma Linda, Moreno Valley, Redlands, Riverside and San Bernardino.

BACKGROUND

In 1999 and 2000, the County of Riverside performed the Riverside County Integrated Project (RCIP) including the associated Community and Environmental Transportation Acceptability Process (CETAP) that integrated land use, transportation and environmental planning into a coordinated blueprint for Riverside County. One of the areas studied in CETAP was inter-county connectivity between Riverside and San Bernardino Counties. This study area was known as the Moreno Valley to San Bernardino County Corridor.

One of the specific improvement alternatives identified in the CETAP studies was the widening, paving and realignment of existing Pigeon Pass Road and its connection with either Center Street or Main Street in the City of Grand Terrace. Extension of Pigeon Pass Road was considered necessary to help meet the needs of inter-county circulating. The CETAP studies also identified enhancements to Reche Canyon Road, east of Pigeon Pass Road, as another necessary inter-county corridor improvement. The widening of Interstate 215 (I-215) is an additional priority for improving inter-county travel. The Counties of Riverside and San Bernardino, together with the Cities of Moreno Valley and Grand Terrace, are jointly carrying the Pigeon Pass Road improvement project forward into preliminary engineering and environmental analysis. The Riverside County Transportation Department is serving as the Lead Agency.

A Memorandum of Understanding has been executed by the participating agencies pledging to simultaneously advance the planning and design of both the Pigeon Pass Road and Reche Canyon Road projects to address traffic growth, local access and inter-county travel needs. Public involvement and input will continue to be a critical component of the planning study process.

Gadgets and Gizmos on display at museum

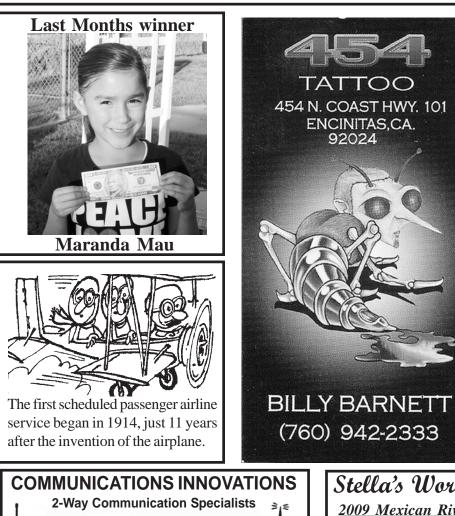

The San Bernardino County Museum has a very interesting display of old inventions, machines and gadgets and gizmos from the past. Many of us now take our cell phones for granted and think nothing of using these small devices as a camera, GPS or testing others. These present modern day inventions are the result of the electronic revolution in technology that we are now undergoing but there were many ideas and inventions that preceded our modern conveniences. Many of these old items are on display and should be seen by all age groups. The interesting part for me is that I remember some of these items as being usable when I was a youngster, before I reached geezerhood!

The museum is accessible from the California St. exit off the I-10 freeway and is located north of the freeway and east of California St. at 2024 Orange Tree Lane in Redlands. Admission is \$6.00 for adults and \$5.00 for students. Children 5-12 are \$4.00.

Rescue at Sea

Author unknown

Years ago, in a small fishing village in Holland, a young boy taught the world about the rewards of unselfish service. Because the entire village revolved around the fishing industry, a volunteer rescue team was needed in case of emergency. One night the winds raged, the clouds burst and a gale force storm capsized a fishing boat at sea. Stranded and in trouble the crew sent out the S.O.S. The captain of the rescue rowboat team sounded the alarm and the villagers assembled in the town square overlooking the bay. While the team launched their rowboat and fought their way through the wild waves, the villagers waited restlessly on the beach, holding lanterns to light the way back.

An hour later, the rescue boat reappeared through the fog and the cheering villagers ran to greet them. Falling exhausted on the sand the volunteers reported that the rescue boat could not hold any more passengers and they had to leave one man behind. Even one more passenger would have surely capsized the rescue boat and all would have been lost.

Frantically, the captain called for another volunteer team to go after the lone survivor. Sixteen year old Hans stepped forward. His mother grabbed his arm, pleading, "Please don't go! Your father died in a shipwreck 10 years ago and your older brother Paul has been lost at sea for 3 weeks. Hans, you are all I have left!"

Hans replied, "Mother, this time I have to do my duty. When the call for service comes, we all need to take our turn and do our part." Hans kissed his mother, joined the team and disappeared into the night.

Another hour passed, which seemed to Hans' mother like an eternity. Finally, the rescue boat darted through the fog with Hans standing up on the bow. Cupping his hands, the captain called, "Did you find the lost man?" Barely able to contain himself, Hans yelled back "Yes, we found him. Tell my mother it's my older brother Paul"

Property cleared at Spring St. and Garfield Avenue

The old blue colored house that was located on the corner of Spring St. and Garfield Ave. has been demolished. On Feb. 15, 2009 we were passing by and noticed that everything on the property was a total mess. In addition to the house being bull-dozed, an old motor home and small trailer were sitting out near the north side of Spring St. and they were a mess too!

Both vehicles and the house have since been removed and this property is now cleaned up.

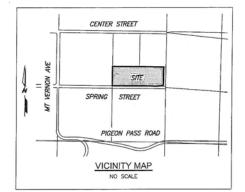

The property was formerly owned by Victoria Homes Inc. but is now owned by A W Properties West, LLC. I received a call from the current property owner regarding what use of this property, and other properties in the area that they own, should be pursued to improve our community and address our needs.

I contacted Chuck Beaty who is a member of the Riverside Unified School District to see if there may be an interest in using the property at the corner of Spring St. and Garfield Ave. for expansion of the Highgrove Elementary School that is located just north of this vacant property.

I received a reply and a map showing the location of a 10 acre parcel that has been set aside for another K-6 elementary school north of Spring St. and east of Mt. Vernon Ave. in the Spring Mountain Ranch area.

I remember this location being named the Helen Keller Elementary School but I understand that the latest name will be the Maxine Frost Elementary School.

With the Spring Mountain Ranch homes delay and other zoning changes that have happened in Highgrove, I wanted to be assured that this land is still going to be a new school site some day.

Future school site in Highgrove?

I also suggested that the property they own on the north east corner of Center St. and Mt. Vernon would be a good location for a shopping center that would provide services to our community. Many of our tax dollars are going to Grand Terrace in San Bernardino County instead of staying in Riverside County due to no services.

TACOS

Available

This old motorhome was sitting next to Spring St. and had been completely trashed. It was pulled out by the street so the county could tow it away.

This old trailer is a good example of trailer trash or in this case- trashed trailer! The property has been an eyesore for a long time but fortunately the house set back from both streets and these 2 vehicles were behind the house. We thank A W Properties and Riverside County for cleaning up this location.

Tour of Highgrove Feb. 18, 2009

Brenda Salas from the Riverside County Economic Development Agency was the driver when a tour was made in and around Highgrove. Supervisor Marion Ashley's office was represented by Jaime Hurtado, The Highgrove Municipal Advisory Council included Denis Kidd and Melanie Zimmermann, Jane Block was there from the Riverside Land Conservancy as well as Highgrove resident and former PAC member Beatrice Etchison, Shopoff Group representative, Brian Rupp, and a member of the Friends of Blue Mountain, Joe Nerio, and Ed Demuth.

L-R Jaime Hurtado, Denis Kidd, Beatrice Etchison, Ed Demuth, Brian Rupp (behind Ed.), Joe Nerio, Brenda Salas and Jane Block. Photo by Melanie Zimmermann.

It was pretty muddy that day but they made their way around to view the various important locations to take a look at what Highgrove needs and wants. They visited locations such as the Spring Mountain Ranch area where the new homes are planned, the new stop sign that is located at Mt. Vernon and Pigeon Pass Road, and other places such as the Norton Younglove Community Center in Highgrove. The above photo shows Denis Kidd at the end of Villa St. making his point to Jaime Hurtado from Supervisor Ashley's office near the location that is wanted for a Metrolink stop!

Las Vegas shark tube

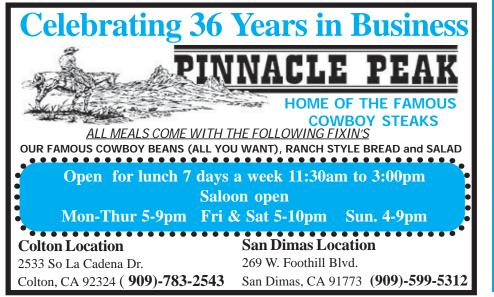

On a recent trip to Las Vegas to celebrate our anniversary, Ardie's birthday and Valentine's Day, we stayed downtown at the Golden Nugget instead of staying on the strip where we usually stay. The pool area has a large aquarium that has a clear tube running through it that is part of the water slide. When swimmers go down the water slide they go through the aquarium in a clear plastic tube right next to the sharks and other large fish and end up in the swimming pool. Not too many swimmers were using the tube because the weather was still pretty cool. But can you imagine what this is like for the shark when dinner goes scooting by and he can't get to it. It's kind of like going past a drive through at 50 MPH. Zoom-There goes dinner!

Ron, my brother and Geri, Ardie's sister went with us and we went to the new Winn casino and the Encore and also had lunch with my brother's nephew Tim, who showed us around town.

Geri and Ardie's classmates from their home town of Orange City, Iowa have a winter residence in Boulder and we met them for lunch the next day. We also met our old time dance instructor Marty Martin formerly from Redlands who now lives in Las Vegas with her sister Libby. We went to Sam's town to meet up with them and had a great time there too!

Disneyland Family Fun Day

The day after we returned from Las Vegas we went to Disneyland. My daughter Sharon was here from Seattle, Wash., Beverly and her husband Rob and our grandson Kipp came from Phelan, Mike and our 2 granddaughters, Roxie and Cheyenne, came from Highland and my youngest son Billy came from Oceanside, but Brenda (Mike's wife) couldn't get off work. Finally my 4 grown children were all able to be in one place at the same time. When the 5 of us went in the T-cups we tried to see how fast we could go and they decided if anyone threw-up they would aim for dad! We spent the whole day with our family group of 10 but our grandson Josh could not come from Seattle. Sometimes we went in different directions but we stayed in touch via cell phones. Aren't these modern devices convenient? This time we did things that we haven't done before such as Tom Sawyer's Island, and riding the paddleboat. Ardie went on the Matterhorn bobsled ride with our granddaughter Roxie and we all really had a good time.

All of this playing around caused a rush to get the March issue ready but the family time was unforgetable! When Ardie's kids and grandkids were here last summer from Iowa we went to Universal Studios, Disneyland, Sea World and had a really good family time with our relatives from the mid-west.

I thought retirement meant spending a lot of time in a rocking chair!

got bones? by Dr Cynthia Williams, Chiropractor

Each year, thousands of people suffer the mower. If it does get too tall, mow serious injuries and even die from injuries they sustain at home. I was reminded of this fact recently when a friend fell while carrying a ceramic dish and cut her hand which required 6 stitches, a student cut his hand on a kitchen knife at home and another student pulled her back cleaning at home. Home injuries are one the most common injuries I have seen, and are the most preventable. I will confess right here and now-I have had my share of them. I will also confess that some of mine were preventable. Understanding how to recognize potential injuries will keep you safer. Here are the top 10 types of activities that cause injuries I have seen (or experienced-see if you can guess which ones!) and ways to prevent them.

10. Painting walls and ceilings

Neck and upper back strains are common. Taking frequent breaks from looking up and doing upper back and shoulder stretches before, during and after this activity can eliminate or minimize the painful outcome.

9. Climbing on the truck tail-gate

If you are a shorter person, you might want to use a stepladder. Make sure the tailgate is level and not wobbly. If you get in the back of a truck frequently, install sturdy handles to grip. Don't grab any part with dirty or sweaty hands. Clear the area around the back and side of the truck "just in case" you fall so you don't land on something that

in short, slow pushes instead of trying to plow through the grass. Mow the lawn when it is dry and it will be easier to push the mower. If you use a mulching mower, you won't need to use the grass catcher bag or have to lean over and pull the awkwardly placed, heavy bag and empty it.

7. Moving furniture

Use gliders under the feet of heavy pieces of furniture. Gliders can be purchased or you can improvise with pieces of cardboard (works well on carpet), small pieces of carpet (turn loop-side down- this works well on floors), a throw rug, blanket or large towel will help you easily push the item. Get a helper and share the load! When trying to get a large, heavy piece of furniture placed against a wall, sit on the floor and use your feet to push it. If it is a tall piece, be sure to have a helper "spot" it and make sure it won't fall over on you!

6. Vacuuming

Try to stand as tall as possible and avoid leaning over the carpet. Instead of the repetitive back and forth motion that is common, move your vacuum slowly over the carpet in one direction then move the vacuum slowly over the carpet in the crosswise direction, letting the vacuum work as it was intended, sucking up the dirt. Using just your arm and shoulder to push the vacuum will strain them. Put your body into it with easy lunges to push the

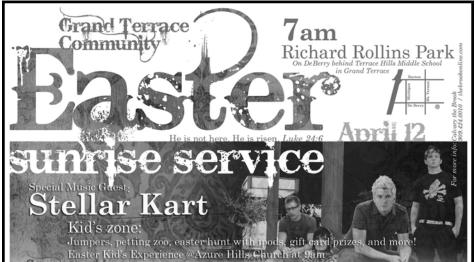

Large pipe not usable now but will be needed for future trail system!

A 12 foot diameter pipe has been installed under the new dirt roadway that was created across the arroyo during the construction of the new large warehouses on the north side of Citrus Street. This view is on the east side of the new road.

Jane Block is standing inside one of the extra pieces of pipe to show its size!

The purpose of the pipe is for a future trail in this area to provide the safe passage of animals and people who want to use the trail system that is being planned. However, at this time the huge pipe does not go under the railroad track. The pipe ends between the new dirt landfill road and the BNSF RR tracks main lines.

Rufus Barkley of Riverside Commercial Investors, who owns the property, said that the large pipe will be sealed at both ends and covered with dirt to prevent access until arrangements are made to extend the pipe under the railroad tracks. The photo above shows where the pipe comes out on the west side of the dirt road next to the railroad tracks. Mr. Barkley said that there is another 48 inch pipe under the dirt road and railroad tracks for water drainage.

Another project in the arroyo north of the new warehouses on Citrus St. is the removal of dead vegetation in the Spring Brook Wash arroyo. This is part of Riverside Commercial Investors efforts to clean and replant the arroyo with new vegetation that is native to the area. This view is looking south across the arroyo to the back of the new warehouses on Citrus Street. Directly behind the photographer is the 19 acre parcel of vacant land that has been mentioned so many times in reference to the land that is needed for the curved track that will connect the Perris Valley Line RR to the BNSF RR and where a Highgrove Metrolink station stop is wanted and needed. The dirt roadway across the arroyo is scheduled to be paved soon, when the parking lot for the new warehouses are paved.

support since 2001.

2. 37 articles from the "Highgrove Happenings" from June 2001 to Feb. 2009.

Questions: How are these 2 documents given to the commissioners after they were turned in on Feb. 11, 2009? Have any commissioners read these 2 items?

PAST REASONS FOR CON-CERN: (Decisions made by the former Executive Director)

On Aug. 16, 2004: I gave Thirty (30) packets to RCTC for distribution to Commissioners but these packets were not given to the commissioners for <u>14</u> <u>months</u> They contained important information, including City resolutions and other documents supporting the Highgrove location.

(Other problems under previous Executive Director):

Nov. 8, 2006: A tour was requested by bus, to show the commissioners the Highgrove location.

Nov. 28, 2006: The tour was made via 2 hi-rail cars on the same day of the Board of Supervisors meeting and none of the 5 Supervisors, who are also Commissioners, could go that day! And the 2 hi-rail cars did not even stop at <u>Highgrove</u>! (Other past problems) SCAG's Highgrove "FEASIBILITY STUDY" STOPPED BY FORMER DIRECTOR:

April 4, 2007: SANBAG voted to: "Reconsider the matter based upon the results of the SCAG feasibility study" But on the following day **April 5, 2007:** The former RCTC Executive Director went to LA and stopped the independent SCAG feasibility study, (Tape recording available) **Timeline:**

June 11, 2003: (5 years 8 months ago), Supervisor Ashley made a motion that: "Directed Staff to explore acquisition of additional right-ofway for a future Highgrove station to serve the Inland Empire/ Orange County Line"

Question: Why wasn't this done years ago? Now only 19 acres of the 35 acres are still vacant.

Stimulus money, Redevelopment money or any other taxes money should be spent wisely. Please don't use tax money to purchase 2 properties when only 1 is needed! One parcel in Highgrove will serve 2 purposes and 3 destinations. This property is needed for the curved track to get to Riverside, and for a Metrolink platform where trains already exist. And Highgrove is in the middle of the triangle between Riverside, San Bernardino and Perris. No tax dollars need to be spent in the courts by using eminent domain to purchase property at Palmyrita where a giant warehouse is under construction, no room for parking, and there are no commuter trains.

THE HIGHGROVE LOCATION BEEN TREATED UNFAIRLY IN THE PAST BUT NOW IT IS TIME TO CORRECT THESE MISTAKES! The 19 acres of <u>vacant</u> land are still "For Sale"!

The notice in the Press Enterprise (Feb. 25, 2009) states: "Environmental studies are available: at the RCTC office,

Riverside Library, Moreno Valley Library and Perris Library. *not been considered and that they never went to Highgrove to look at*

Question: We have a library in Highgrove. Why didn't the Highgrove library get copy?

Our goal is not to stop commuter trains from running on the Perris Valley Line but we want the <u>station stop</u> located where it is the most practical, cost effective, and will serve the most riders. HIGHGROVE IS THAT LOCA-TION! R.A. "Barney" Barnett

Information can be seen on our web site: <u>www.highgrovehappenings.net</u> or call (951) 683 4994

After the Feb. 11, 2009 public hearing was closed, the Commissioners had several comments about the concerns from the public.

Supervisor/Commissioner Marion Ashley said he supports the Perris Valley Line and thought the comments made by Denis Kidd, Don Earp and "Barney", were "sensible, reasonable and farsighted". He also said they need to "look at this strongly because it makes a lot sense but he does not want to endanger the stimulus money for this project".

Commissioner Mary Crayton from Canyon Lake stated that she was not satisfied why Highgrove has not been considered and that they never went to Highgrove to look at the property. She stated they should consider the property in Highgrove.

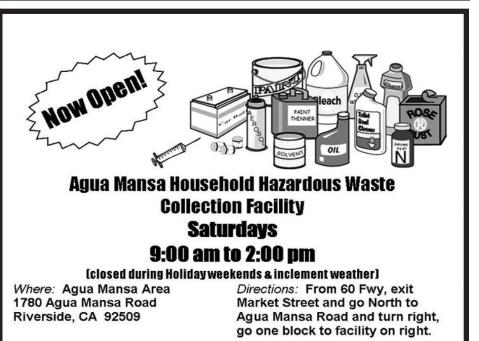

Commissioner **Roger Berg** from Beaumont said the Highgrove station may have some merit, more parking is needed and gridlock will only get worse. He said "everyone has to give and take, and that "Barney" has a good idea and it is something to look at.

Commissioner James Potts from San Jacinto said it is the right project for the right time and it would open up other areas where seniors could go instead of just driving locally.

Commissioner **Robin Lowe** from Hemet recognized the amount of work that has been done on this project and said they need to revisit this idea.

Supervisor/Commissioner Jeff Stone was sympathetic to the concerns of those living near the track and said that the I-215 is reaching capacity and that people need to get out of their cars, onto the trains and to their destination. He also ask for an extension in receiving written comments from the public.

Written comments will be received until April 8, 2009 for the Highgrove Metrolink. Address them to Edda Rosso, RCTC, P. O. Box 12008, Riverside, Ca. 92502-2208 and send a copy of your letter to highgrovenews@roadrunner.com

A COVING⁹⁹ LOOK AT POLITICS by Jerry Loving

Where is all this \$\$\$timulus Money coming from?

Folks, no kidding. It doesn't make any difference who is President; it is Congress that collects and spends the money. Now, where is all this stimulus money coming from? There is a far more important question that needs to be answered than the first question and it is: Who is getting ALL this money and under what conditions?

According to the world economy, we are the richest country in the world. Our Congress has access to literally trillions of dollars. However, there is a down side. All the talking heads in the media are getting you to focus on the stimulus package and not where the money is coming from. Plus, one indicator that a country is broke or going broke is the strength of their dollar on the open market. Right now we are in deep trouble with the rest of the world. Just for starters: we owe China nearly one trillion dollars. So you can see the zeros, that is: \$1,000,000,000,000.

Income tax makes up only nineteen percent of the money that Congress collects. There are import/export taxes which add another seven percent and then there are treasury notes. Congress, or the Federal Reserve, which is uncontrollable and should have never been created in the first place, generates the most dollars for Congress to spend. You can thank Franklin Roosevelt for this one. Plus, they can dictate the value of our dollar. Therefore, the silver Certificates that were once in circulation are worthless. And, you can thank President Nixon for taking us off the gold standard.

Also, there seems to be some confusion on the price of a barrel of oil and the price at the pump. For example, in the late 1950's, oil was \$35.00 a barrel but at the pump it was less than .21 cents a gallon. A barrel of oil is now about \$35.00 a barrel but we are paying over \$2.00 a gallon. Why? Have you ever checked how much of the price of gas goes to taxes for Congress?

What about the five cents that was added to a gallon of gas years ago to fix the bad roads and bridges in America. Well, we still have bad roads and bridges but congress gets the money. We use up over 1,000 barrels of oil per SEC-OND. Now, do the math. One barrel of oil generates 33 gallons of gas. And Congress collects five cents per gallon or 33,000 gallons of gas at 5 cents per gallon or \$1,650 per second in just the road tax. My math computations tell me that it is over \$1.4 Billion per day.

Now, without looking at the budget, special programs, or whatever, the money flow to Congress is constant. And there is money they get we don't even know about or they have to account for. So why are we in trouble and need this so called "stimulus" package? Politics and greed. Years ago an accountant calculated that an executive or an athlete should make about 15 times what the average worker makes. If you can remember, Mickey Mantle got \$100,000 for signing with the Yankees and it was front page news all over the world. I know you are not going to believe me, but the rate now of an executive or athlete to the average worker is 400 times the average pay!!

This doesn't include bonuses, rip off investment schemes, or the under the table money that is made from drugs. They say that the Miami, Florida economy is dependent almost 85 per-

cent on drug money. Yet, we keep it illegal and therefore the profits go higher and higher and the gangs get meaner and meaner. Same thing with tobacco and alcohol. Cigarettes in America are around \$5.00 a pack because of the lawsuits yet they are making a profit. A pack of Winston's in China cost twenty five cents. Go figure.

In closing, we are a wealthy country but only 4 percent of our population gets the money. The rest of us have to compete for a dollar. So, next time you see or hear someone talking about the "stimulus" package, <u>tune them out</u>. What we want to know is: who is really getting the money-Really!

And our great grandkids will shoulder the responsibility for paying back all this money which we really already have.

Editor's note: The opinions expressed in this article are the viewpoints of its author and do not necessarily reflect the viewpoints of the "Highgrove Happenings"

PIGEON PASS ROAD (continued from page 5) LOCATION

The proposed project is located southeast of the City of Grand Terrace and north of the City of Moreno Valley, generally within an unincorporated portion of northwestern Riverside County. The northern end of the project is approximately 1.5 miles east of I-215 and the southern end of the project is approximately 3.0 miles north of State Route 60 (SR60).

NEED - WHY IS THIS PROJECT IMPORTANT?

The project is needed to address north-south mobility between Riverside and San Bernardino Counties and to increase safety and improve access and circulation throughout the project area. Failure to address the situation will result in further deterioration of inter-county mobility. Specific transportation problems and issues that exist within this area include:

 \cdot Existing and projected population and employment within this corridor will further increase the burden on existing transportation facilities

- Difficult access to and from communities in Moreno Valley and Grand Terrace
- Heavy congestion on the I-215/SR60 freeway is projected to increase significantly over the next 20 years

• Employment and goods movement needs at March Air Reserve Base and Loma Linda Hospital are expected to increase significantly over the next 20 years

• Indirect and limited transit service between Moreno Valley and San Bernardino County

BENEFITS – WHAT ARE WE TRYING TO ACCOMPLISH WITH THIS PROJECT?

The Pigeon Pass Road Corridor Project would provide an alternative northsouth connection between Moreno Valley and Grand Terrace. Local traffic would have a more direct route between these communities instead of circling around to the south and west on the freeway system. Implementation of this transportation improvement project will result in numerous mobility benefits. The project is expected to: Increase safety on the existing highway network Reduce peak period travel times between the connected communities Reduce congestion and improve existing and future operations on existing north-south routes Improve transit opportunities Protect the existing community character and environment Improve the reliability of travel and access to the existing highway network Enhance emergency access and reduce emergency response times for areas served by the local circulation network. FUNDING

The project will be funded from local funding sources. These funding sources include development fees from both Riverside and San Bernardino Counties. The program in Riverside County is known as the Transportation Uniform Mitigation Fee (TUMF) program, which was created to fund improvements intended to mitigate traffic congestion due to development within western Riverside County.

got bones?

Continued from page 7

glove" on the hand that is holding the food. These gloves are a miracle in that they will prevent most cuts if a knife gets to your holding hand. Use only sharp knives; dull knives create too much work and will cause a knife to slip. Use the right knife for the job; or use kitchen shears for some jobs. Kitchen shears are great for cutting chicken, vegetables, fruits, and other foods.

4. Draining hot water

Do not pour the water out too fast or it may splash back out towards you! Run cold water in the sink at the same time and it will help tame the steam that can block your vision or steam up your glasses. Use hot pads that are large enough to protect your hands. If the pot is very large and heavy, use a long-handled sauce pot to drain off some of the water before you pick up the pot, same thing for filling this large pot. This will help prevent upper back, shoulder and neck injuries from lifting a heavy pot.

3. Scrubbing the bathtub

Consider using a dedicated toilet brush or a sponge mop to avoid leaning and reaching into the tub. Have your kids scrub down their bathtub ring before they drain the tub. This will help reduce your cleanup later. You can also get in the bathtub to avoid reaching the walls around the bathtub. Make sure you do not use sprays or cleaners that are slippery! Wear slip resistant shoes in the tub or stand on a mat to avoid slipping in the tub.

2. Mopping the floor

Do not use too much water or lean over too far as you are mopping. If you are tall and the mop handle is short and you have to lean over, change it out for an extending pole handle. The corners and edges are the hardest to clean. Cover your sponge mop with a few layers of tulle netting to give your mop more scrubbing ability. Wear shoes that have slip resistant soles.

1. Trips, slips and falls are one of the most common injuries in the home. Liquids, toys, and throw rugs can all be potential hazards. Start by turning on the lights before you walk through a room- scout it and look for those hazards. Clean up liquids, pick up toys and repurpose and replace slippery throw rugs (see tip #7).

Keeping an eye out for hazards, slowing down, and changing the methods you do things can prevent many potential serious injuries or even death.

Advertising rates

The "Highgrove Happenings" advertising rates are the lowest rates in town. If you have already trained your dog to bring in the paper (like the one on the right) you can be assured that he won't be lifting anything too heavy by bringing in our little newspaper. Some of the other larger newspapers are wasting just too many trees, especially in

their Sunday edition. No one should ever ask their dog to lift something that heavy! Our little paper may not have much news in it, but we take pride in providing you with something free that you can put in the bottom of your birdcage! Give us a call (951) 683 4994 or check out our web site for the pricing and sizes of our ads or go to

http://www.highgrovehappenings.net and click on the contact page.

Highgrove Happenings website <u>http://www.highgrovehappenings.net</u>

We have no reporters so we are asking for your help. You can be a reporter just by giving us a call or sending us an Email. Small town news is what we are all about and we want to encourage you to participate. We try to print positive things since there is so much bad news on TV and in other newspapers. Send us a story or call us at (951) 683 4994
